CS 280: Introduction to Formal Languages and Theory of Computation

Date of Handout: 22 Oct 99.

The **midterm** will be on Wednesday 3 November in class. The test will include topics covered in class on or before Friday 29 October.

A previous handout said that **homeworks** will be handed out every Wednesday and will be due the following Monday. Change that to the following Monday or the following Wednesday. Every homework will have a due date written on it. Homeworks are due in class on that date. I will handout solutions at the end of class on the same day.

Two **books** have been placed on reserve in the Eckhart library: D. Kozen, *Automata and Computability*, QA267.K69 1997 and M. Sipser, *Introduction to the Theory of Computation*, QA 267.S56 1997. Both are wonderful books and are enthusiastically recommended.

There is now a **web page** for the class. The web page is currently under `http://www.cs.uchicago.edu/ divakar/CS280/`. It will soon move to `http://www.classes.cs.uchicago.edu/courses/current/CS280`.

The **grader** for this class is Murali Krishnan. His office is RY 162A, Phone 702-3496, Email *gmkrishn@cs.uchicago.edu*. You can go to him with questions about grading or the course material.
